

Put the projected month cards here

Align each target to the

corresponding row on the

adjustment board.

Start of a phase:
Draw 4 monthly target cards.
Play face up so that each 4 sets of
stock center targets are shown.

Place the current month target
marker on the next month target.

After rolling 3 $[+]/[-]$ dice. Realign the
target marker up or down that many
spaces. If result is zero then the marker
stays in the same place. If you reach to
the top or bottom just continue looping
around the bottom or top.

\$7	Whenever a stock tries to go above this level each player gains \$2 for each of their shares of that stock.
